EDUCATION

University of Maryland, College Park

B.S Computer Science / Minor in General Business

Sept 2022 - May, 2026

College Park, MD

GPA: 3.7/4.0 - University Honors & Dean's Merit Scholarship Recipient

Yonsei University

Exchange Program

Fall 2024 Semester

Seoul, KR

WORK EXPERIENCE

Cloudflare

April 2026 - Present

Software Engineering Intern - Product SRE / Infrastructure

Austin, Texas

- Develop and maintain an internal reliability platform used by 1,000+ Cloudflare engineers, PMs, EMs, and VPs to track incidents, follow-ups, service health, and team operational workflows across the organization.
- Build Go backend services and REST APIs deployed on Kubernetes, backed by PostgreSQL, and secured with Cloudflare Access JWT authentication.
- Improve reliability and observability of a background worker syncing data from 8 external APIs every 15 seconds by adding Prometheus metrics, Sentry error tracking, and bounded-concurrency goroutine fan-out.
- Ship full-stack production features end to end, including SQL schema migrations, Go integration tests, React/TypeScript UI updates, and deployments to staging and production Kubernetes environments.

Stone Ridge Technology

Jan 2026 - Present

Full Stack Developer (Contract)

Bel Air, MD

- Build backend integrations and database workflows for a GPU compute platform supporting AI/ML and high-performance workloads, including customer onboarding, subscription management, user administration, and account settings.
- Develop full-stack dashboard features using TypeScript, Python, Docker, and Postgres/Supabase, including schema changes, API integrations, and customer-facing account management flows.

USAA

May 2025 – Aug 2025

Android Software Engineering Intern

San Antonio, TX

- Developed native Android features in Kotlin and Jetpack Compose for USAA's large-scale insurance and banking app, contributing to billing and DriveSafe user journeys across a 14M+ member product ecosystem.
- Built Compose UI screens and reusable components for billing workflows, improving the mobile experience for members reviewing payment information, policy details, and account actions.

CCACC Academy

June 2024 - Oct 2024

Web Developer | Aug 2024 - Oct 2024

Rockville, MD

- Built and launched a responsive 16-page React website serving 1,500+ monthly users, with reusable UI components, navigation flows, calendars, animations, and program content sections.
- Collaborated directly with the client to translate requirements into user-facing features, including signup forms, real-time event calendars, carousel slideshows, and external API integrations.

PROJECTS

Serverless Monitoring & Alerting System

Feb 2025 - April 2025

- Built a real-time monitoring and alerting system using Go, AWS Lambda, and Terraform to poll 5+ e-commerce pages on scheduled intervals.
- Integrated Telegram and Twilio APIs to deliver alerts, enabling 50+ successful purchases of high-demand items.
- Automated scheduling with AWS EventBridge and deployed a fully serverless infrastructure stack for scalable, low-maintenance alerting.

SKILLS & INTERESTS

- **Languages:** Python, Java, C++, Go, Kotlin, JavaScript, Typescript, HTML/CSS, SQL, C
- **Technologies:** Kubernetes, Docker, PostgreSQL, AWS, Terraform, Git, React, Jetpack Compose
- **Other:** PyTorch, TensorFlow, OpenAI API, Flask, Express, Django, Node.js
- **Interests:** Poker, Weightlifting, Video Games, Film, Hiking, Video Production, Soccer, Volleyball
